Education

Bicentennial University of Aragua (Universidad Bicentenario de Aragua)

Systems Engineer (2021-2025)

Professional Projects/Jobs

Blockchain and Cripto Alerium

In this project I create my own blockchain and cryptocurrency, programmed with python

https://github.com/vladibovilla/Blockchain_and_Cripto_Alerium

Marketplace_Uridium

In this project, I wanted to create a page that serves as a marketplace for buying and selling digital items using python and stripe, project in beta phase

https://github.com/vladibovilla/marketplace_django-Stripe

Social network with django

In this project, I wanted to create a social network with python and django, my biggest personal project and it's still in development.

<https://github.com/vladibovilla/Red-Social>

Jovision Venezuela

I was part of the work in the backend for the page of Jovision Venezuela, a network company, this being my first work experience
